- Italian (Basic)
- French (Basic)

Skills

- Punctuality and commitment
- Strong familiarity with AIs and prompts
- Professional customer service
- Leadership
- Teamworker spirit
- Clear and effective communication
- Effective problem solving
- Strong learning capacity
- Flexibility and adaptability
- Organizational capacity
- Analytical thinking
- Creativity and Proactivity
- Driving license B

I am currently a student looking for experience, responsible and rigorous with my work, methodical in each assigned task, hardworking and fast learner. I have facility to express myself and connect with all types of audiences and work teams. I am punctual and organized for any new job or project.

I consider myself a front-end focused developer, as it is what I have worked on personally and academically. Even so, I am still studying to expand my knowledge in back-end, since my future goal is to be a profesional project manager.

Profesional Experience

- Jan 2023
- present

RealMadrid CF VIP Area Hostess

NewLine Events, Madrid, Spain

Welcome VIP customers and ensure they have a pleasant experience from the moment they arrive. Provide personalised customer service assistance during the event, offering information about the stadium and dealing with special requests. As a team, we pride ourselves on being able to offer the best customer service in Santiago Bernabéu, the best football stadium in the world.
- Mar 2022
- Jun 2022

Web and Network Maintenance Technician (Erasmus+ WBL)

Coop. soc. IL SOGNO arl, Rome, Italy

I was part of a very dedicated and dynamic group dedicated to keeping the network and office equipment in top shape. We also maintained one of the company websites, ensuring that everything ran smoothly and that our customers had the best possible experience.

Academic Background

- Sep 2022
- present

Web Applications Developer Technician

IES Tetuán de las Victorias, Madrid

Advanced training in web application design, development and maintenance. Skills in database management, intuitive and responsive interface design, and implementation of secure and scalable solutions. Knowledge in agile methodologies and version control, with the ability to integrate third-party services and APIs.
- Sep 2020
- Jun 2022

Microcomputer Systems and Networks Technician

Salesianas Plaza Castilla, Madrid

Computer assembly and maintenance, single-user operating systems, office applications, network operating systems, local area networks, computer security, web applications, network services. I undertook a work-based learning (WBL) placement in Rome, Italy, with the support of an Erasmus+ scholarship, which proved invaluable in facilitating my professional development.
